

Answering one of the following questions, please write a 1200 (-/+ 10%) word essay:

- In one word, describe the current state of our society. elaborate and suggest realistic improvements.
- If you could create an invention, or solve an existing problem, what would it be and why? How could established organisations contribute to such an invention or become part of a solution to the problem you've identified.
- How can we live well today while protecting the planet for tomorrow? think individual, industry, policy, innovative responsibilities.
- Describe the importance and/or symbolism of Indigenous culture. How can it maintain its relevance and power in an increasingly corporate world?
- Describe the purpose of your study and how it impacts you and your community. e.g. social, cultural, generational impacts. exclude financial or material gain.

Your essay should include an introduction, 3-5 main points and a conclusion.

Please include the question you are answering.

You do not need to reference your work academically, but your writing should reflect credible sources if using them as references (statistics, mentions, etc).

If you do not meet the minimum word count, you may not be considered.
